autograph  
paragraph

## Class Website

The class website is up and running. I try to update it at least once every two weeks. The newest thing on the website is math letters that explain the units of study. The latest unit, Inequalities, has a parent letter under the Class newsletter section. This letter explains the unit and topics taught. Please feel free to check it out. Also, below is the link to my website.

## Topics for the Upcoming Week

Math: Understanding what equal means

Literacy: Comparing Characters in a series

Writing: Writing Reviews

Science: Bones and the Human Body

## Spelling and Word Study

Your child has a weekly list of words to study and work with at home. I will also be putting in your child's ship's log a sheet explaining the activities they can do with this words. This work is due every Friday. The students have copied their words into their agenda this week. The minimum they can do is write 10 sentences.

## Specials Schedule

Monday: Art and Music

Wednesday: Explorers and Media or Technology

Friday: Gym

## Field Trip Information

My room moms are setting up a sign up genus for parents interested in going on the field trip. Please respond to this or email me directly to let me know if you plan to go on the field trip. We will be leaving the school at 9:45 and returning around 1:00. We will eat lunch when we get back to the school. Also, we will not be going to the gift shop while at the museum. I am looking forward to this learning experience.

## Multiplication and Division

In math we are studying multiplication and division. We are working on learning our facts for multiplication to help with division. Any practice the students can do at home on their multiplication facts will help them learn them quicker. Also, practicing skip counting will help them to learn them, as well.

## Math Stars

My procedure for math stars is that it goes home every Wednesday and is due back the following Monday. Then when I sent it home again on Wednesday, I will only give it to the students who have turned it in. If your child doesn't get one, please email me or have your child ask for one the following day and I will be happy to give them one. These are great opportunities for math enrichment.

You can reach us at school at (919)694-0300, or by email. Please feel free to contact us with questions or concerns.
